This Kit will adapt the M90 Eaton Supercharger (1989 - 1993 Thunderbird SC Model) to the 2002 Ford Ranger SOHC 4.0 Engine. This M90 has an (oval) inlet directed to the rear. The "KIT" is specifically designed to fit the referenced vehicle. It will adapt to other Ford SOHC 4.0 Engines but clearances should be verified (prior) to purchase. The low profile design will allow hood closure, and the appearance of a stock vehicle. **M90 SUPERCHARGER is (NOT) included in the KIT**
